- Residential building real estate group,
- Industrial building real estate group,
- Commercial and public building real estate group.

SHP format files [here](#)

Data specification available [here](#)

Updated once every 4 years

THE OPENING OF
OUR DATA MADE
US **STRONGER!**

OPENING OF OUR DATA WAS LIKE AN EXAM OF MATURITY FOR US BECAUSE:

We have data quality assistants
– data enthusiasts now.

We have more valuable data
than we thought before.

Our communication with users
of our data is more open.

Opening of data made
our team more cohesive.

EXPECTATIONS VS REALITY

EXPECTATION

We will not be able to deal with the customer inquiries

REALITY

We were afraid of several hundreds of questions, but in fact we got approx. 46 questions per quarter

50% of cases are consultations regarding the open data

EXPECTATION

We will not be able to deal with all complaints regarding the data quality

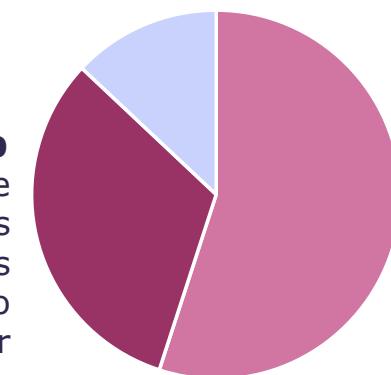

18

REALITY

Of all the messages received, 42% are error notifications of which:

13%

For an error, the update of which must be proposed by the owner

32%

For a mistake which was checked and was not detected to be an error

55%

On error which was detected and resolved

The investment in data quality management was justified

EXPECTATION

We thought that opening our data would sharply reduce the demand for the data services

REALITY

The demand for high value-added data services increased **by 10%**

We no longer provide basic data services

EXPECTATION

We thought that opening our data would have a negative impact on our reputation

REALITY

The society is more supportive than expected

Cooperation with the non-governmental sector is now stronger - we understand each other better

EXPECTATION

We will not know if and how the public uses our data

|

21

REALITY

We have no control over data usage!

We know some socially active examples: *Jana seta group/ dodies.lv, Openstreet map, Lursoft*

data.gov.lv we are **TOP 10** with our Open data

CONCLUDING OUR STORY AND MOVING TOWARDS OUR COMMITMENT:

We have 2 unopened datasets as seen before.

We are working on the necessary regulations in cooperation with the national security authorities to make them open.

**WE ARE NOTICED INTERNATIONALLY–
Google IS INTERESTED IN USING OUR
ADDRESS DATA!**

OUR COMMITMENT

WE WILL CONTINUE TO
PUBLISH NEW DATASETS AND
TO IMPROVE THE EXISTING
ONES
