

# Breakout Session

## Group D

# Group D

Austria (2)

Croatia (1) [not updates of ERM because of no resources]

Hungary (1) [not updates of ERM because military organisation stops the contract]

North Macedonia (4)

Slovenia (3)

# Breakout Session Feedback

- **This year production**
- Positive feedback about the validation tool
- Austria has problems to upload the validation results to PMS
- Slovenia likes to check the assembled data because of the sensible border situation

# Breakout Session Feedback

- **Next year production**
- Unclear responsibilities in Hungary
- Croatia hopes to get new staff for production

# Breakout Session Feedback

- **Special border issue between Slovenia and Croatia**
- Because of possible political impact the actual borders are not changed although there are sometimes very small differences (at rivers)
- There are overlaps but also gaps  
Decision: missing features in no man's land are in future provided by Slovenia with ICC code = “no man's land” (we cannot use SI or HR)

# Thank you!
