Albania	yes (new in seamless database)	none
Bosnia and Herzegovina	yes (only country dataset)	VMap
Kosovo	yes (provided by Serbia and Kosovo)	provided by Serbia
Armenia	none	none
Azerbaijan	none	none
Belarus	none	none
Georgia	none	yes (no BND)
Ukraine	none	none
Russia	none	none
Channel Islands	new coastlines	none

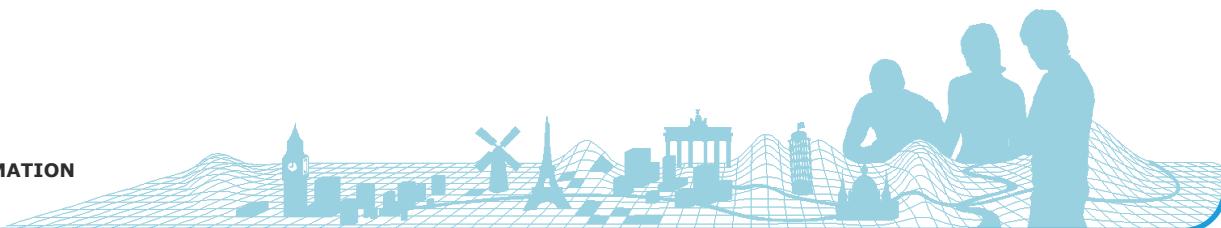

Why increase coverage?

- EuroGeographics wants to increase coverage for many reasons:
 - To fulfil our Eurostat contract
→ Content with progress but acknowledge we are not there yet
 - To support our other existing customers
 - To improve our products
 - To support our members by promoting their data

Eurostat Contractual requirements

- We will continue to engage with our members to encourage participation in our Pan-European Products
→ We feel we have made significant progress in the last year
- Outermost Regions
 - Made good progress on identifying the contacts
 - France and The Netherlands are working on this area of the world
 - Eurostat confirmed it was not high on their agenda
- We will continue to engage with you, the data producers, supporting you to provide the data to our current specifications

EuroGeographics Support

- We have allocated some budget for capacity building
- BUT we need to know what support you need:
 - Run webinars for data producers
 - Working with Head Office colleagues to communicate “why” to senior decision makers
 - Please use your Regional Coordinators for support
 - New QA process should support your activity
 - Use this networking event to share knowledge...!
- Some data is better than nothing
- Please get in contact with Angela to discuss further

Thank you for your attention
