

Improving efficiency, transparency and data access through e-services

Gyula IVÁN
Senior Adviser on Cadastre
EuroGeographics Webinar on User Oriented Services
25. March 2021

Background

- In 2019 the responsibility of surveying and mapping transferred from Ministry of Agriculture to Prime Minister's Office (acts as Ministry)
- Lechner Knowledge Center Nonprofit Ltd. is a state owned enterprise under the supervision of Prime Minister's Office
- Lechner Knowledge Center is a professional background institution to the Prime Minister's Office specializing in architecture, land records GIS, geodesy and surveying. The company's mission is the digitalization and promotion of the wide range of public services, it provides relating to the built environment and spatial data.

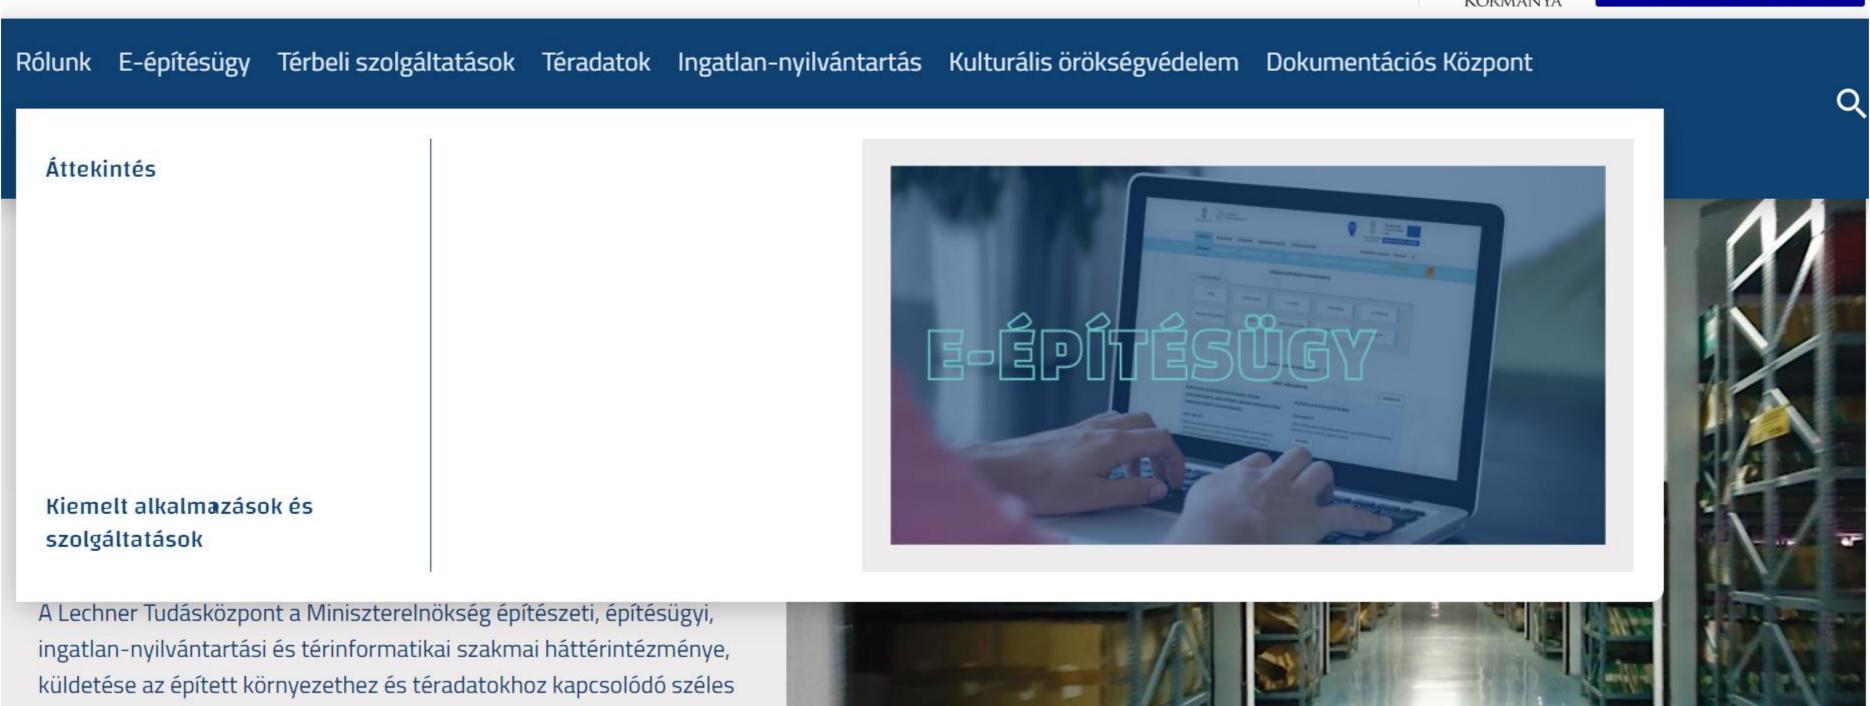

BEFEKTETÉS A JÖVŐBE

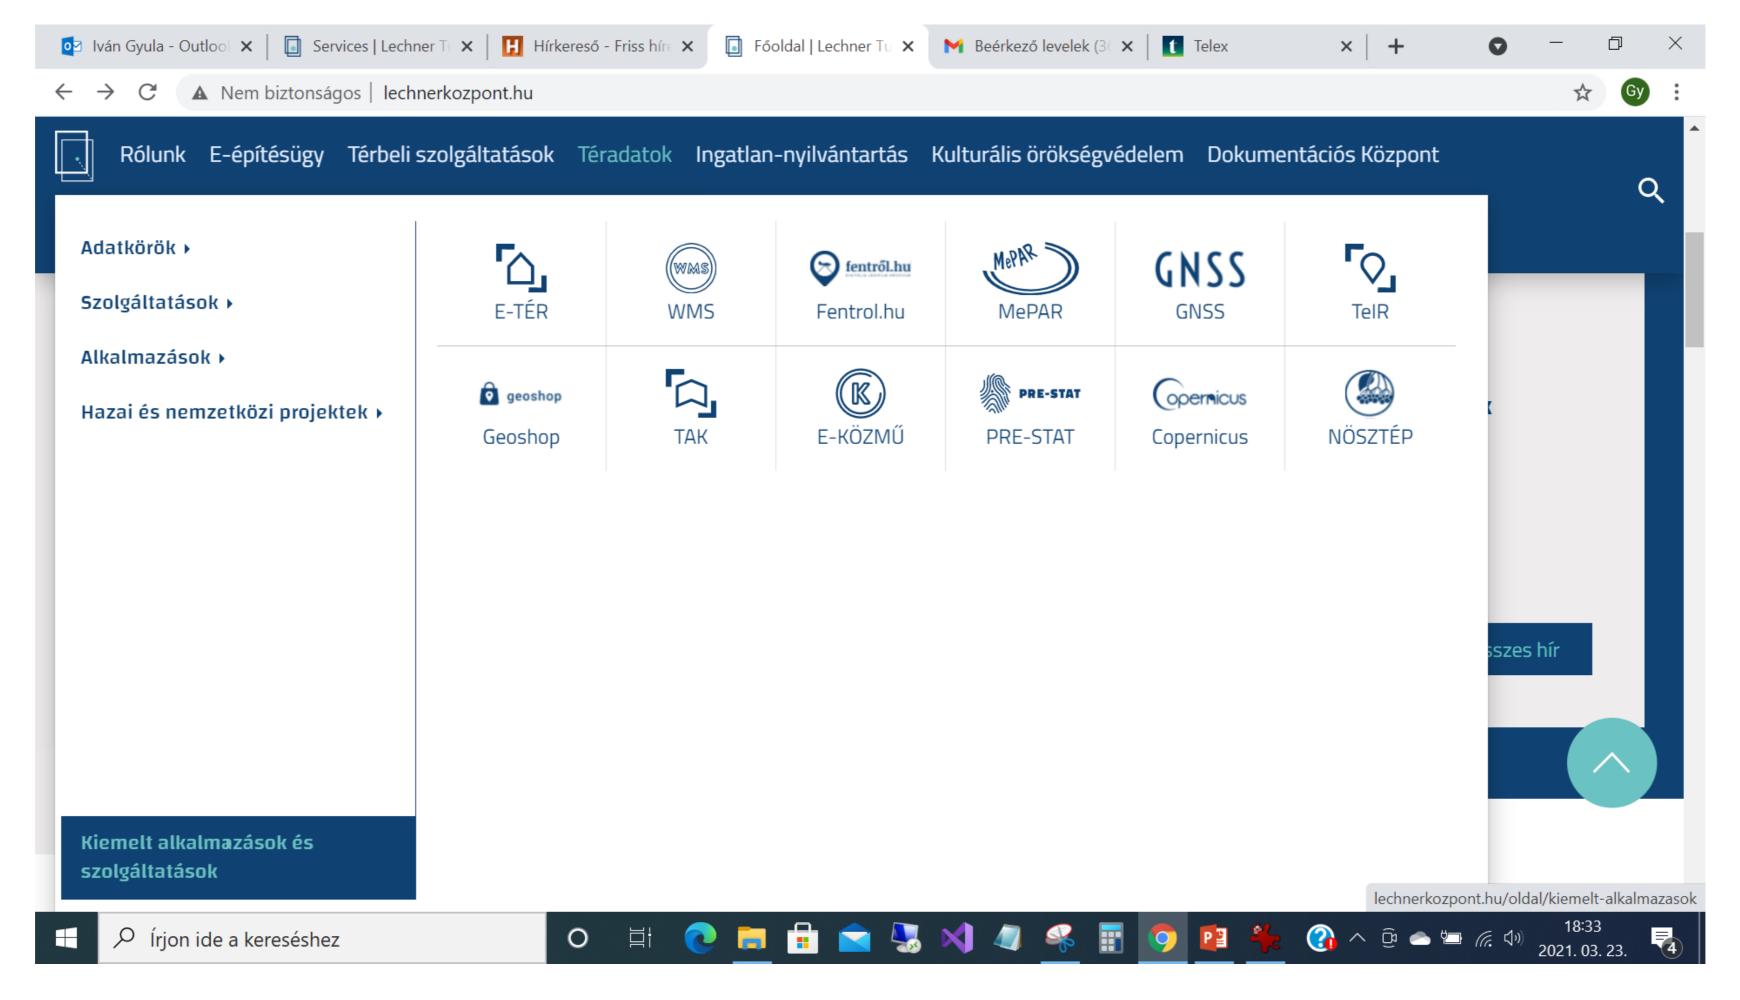

E-Construction

körű közszolgáltatásainak digitalizációja és társadalmasítása.

Integration of Services (E-Utility)

Source: Ágnes KOZÁRI-Márk Cebei: Important Services of E-Construction System for Surveyors (in Hungarian). Global Surveyors' Day, 18th March 2021, Budapest, Hungary.

Conclusions

- Lechner Knowledge Center Nonprofit Ltd. has a wide range of activities, services, e-services on the field of architecture, land records GIS, geodesy and surveying
- Integration of activities is too young to establish fullyfunctioned real, integrated e-services, but the first results showed that it can be fruitful
- This improvement on services would result more efficient and transparent e-services

Thank yo very much for your attention
