

Business Continuity in response to the COVID-19 pandemic – Business Continuity in OSI

Colin Bray, Chief Executive & Chief Survey Officer

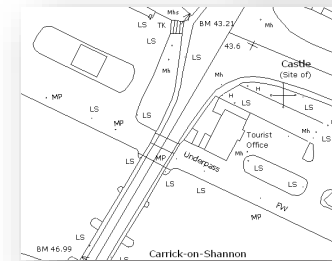

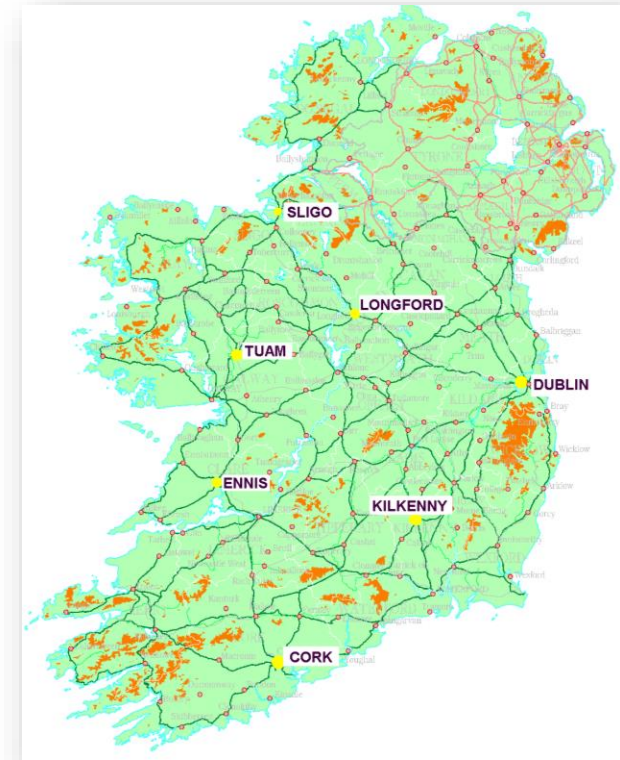

EuroGeographics General Assembly
Webinar Series 3 – Business Continuity
15th October 2020

Rialtas na hÉireann
Government of Ireland

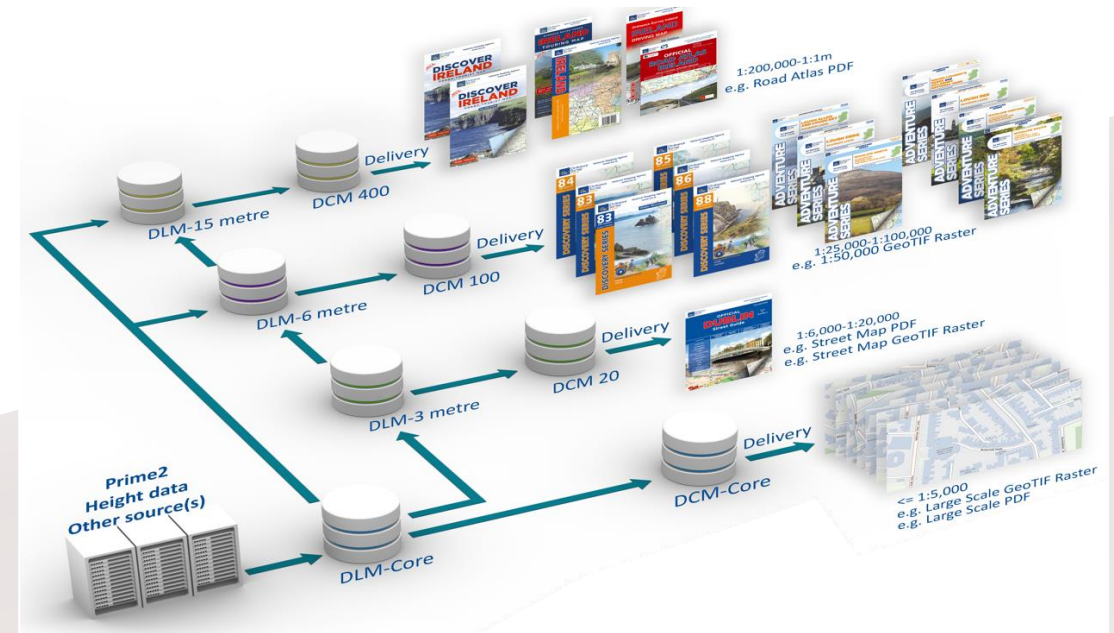

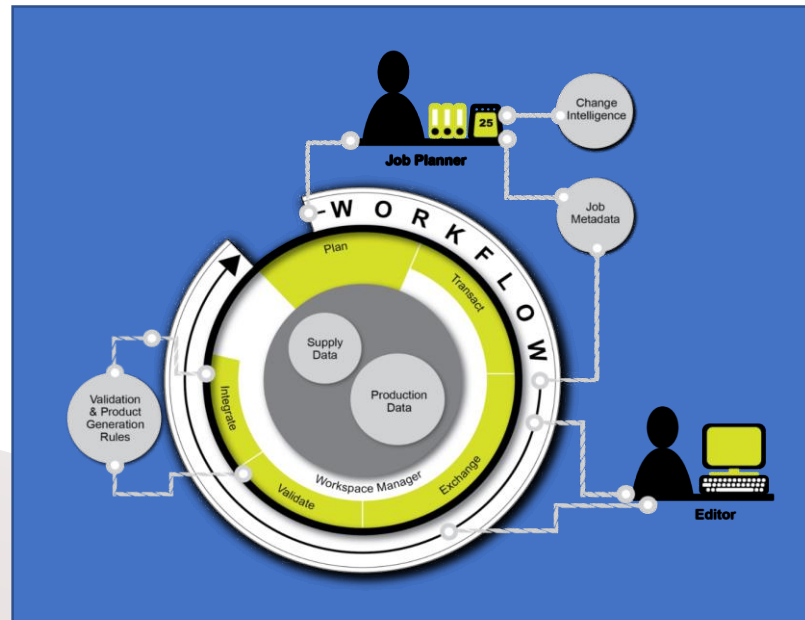

Ordnance Survey Ireland

- › Irish national mapping authority, established in 1824, State Body since 2002 (*OSi Act 2001*).
- › Mandate: *“To provide a national mapping service in the State... creating and maintaining the definitive national mapping and related geographic records”*
- › Produce national geospatial data from 1:1,000 to 1:1,000,000 and have responsibility for national geodetic activities and the maintenance of Statute Boundaries.
- › Non-Commercial State Body (NCSB) that undertakes commercial activities to support operational funding.
- › Head Office in Dublin and 6 Regional Offices with total of 230 staff, including 35 field staff and 2 aircraft.

OSI's Operating Environment

- › Systems approach to all operations
- › Orchestrated rule-based workflows
- › Maintenance of national object model (not a map)
- › Automation of cartographic products and webservice
- › Significant Remote Sensing capability

BCP – Being prepared for a ‘new normal’

- › Had established an Incident Management Team (IMT) with twice yearly BCP exercises around operational continuity during a period of site restrictions.
- › Significant investment over the last 10 years in fully digital orchestrated workflows, new data model, cartographic automation and E-Supply system.
- › Had implemented a hybrid public/private cloud operating environment.
- › Had invested in Server Virtualisation and Virtual Desktop Infrastructure (VDI) technology.
- › Developed contingency mono-plotting photogrammetric data collection flowlines at the end of 2019.

Coronavirus **COVID-19**

If you have fever and/or cough you should stay at home regardless of your travel or contact history.

How to Prevent

- Wash**
your hands well and often to avoid contamination
- Cover**
your mouth and nose with a tissue or sleeve when coughing or sneezing and discard used tissue
- Avoid**
touching eyes, nose, or mouth with unwashed hands
- Clean**
and disinfect frequently touched objects and surfaces
- Stop**
shaking hands or hugging when saying hello or greeting other people
- Distance**
yourself at least 2 metres (6 feet) away from other people, especially those who might be unwell

All people are advised to:

- > **Reduce** social interactions
- > **Keep a distance** of 2m between you and other people
- > **Do not** shake hands or make close contact where possible

If you have symptoms visit [hse.ie](https://www.hse.ie)
OR phone HSE Live **1850 24 1850**

Symptoms

- > Fever (High Temperature)
- > A Cough
- > Shortness of Breath
- > Breathing Difficulties

Affected Regions

Check the list of affected regions on www.hse.ie

Ireland is operating a containment strategy in line with WHO and ECDC advice

Rialtas na hÉireann
Government of Ireland

Initial Action (transition to temporary home working)

- › Formally stood up the Incident Management Team (IMT) chaired by the CEO – meeting daily for 1st month, twice a week for 2nd month, and now weekly.
- › Within 2 weeks of national lockdown we had 98% of our 230 staff working at home productively with 4 IT staff remaining in Head Office to support remote working (270 devices available).
 - 100 laptops available prior to lockdown
 - 35 Tough Pads used by field revisers
 - 80 Virtual Desktop Interface (VDI) units purchased end of 2019 for rollout in 2020
 - Purchased an additional 52 laptops in March 2020
- › All staff received updates and links to official Health & Safety guidelines, Data Protection Guidelines, IT Security Awareness, Employee Assistance Service and OSI 'COVID-19' Intranet section developed.

Initial Action

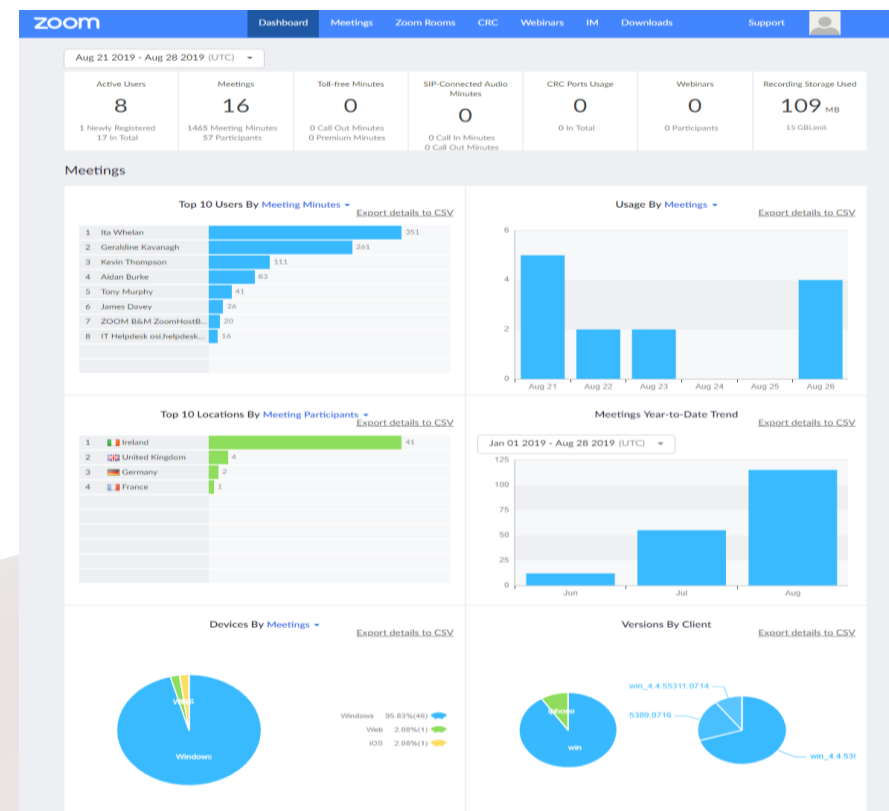

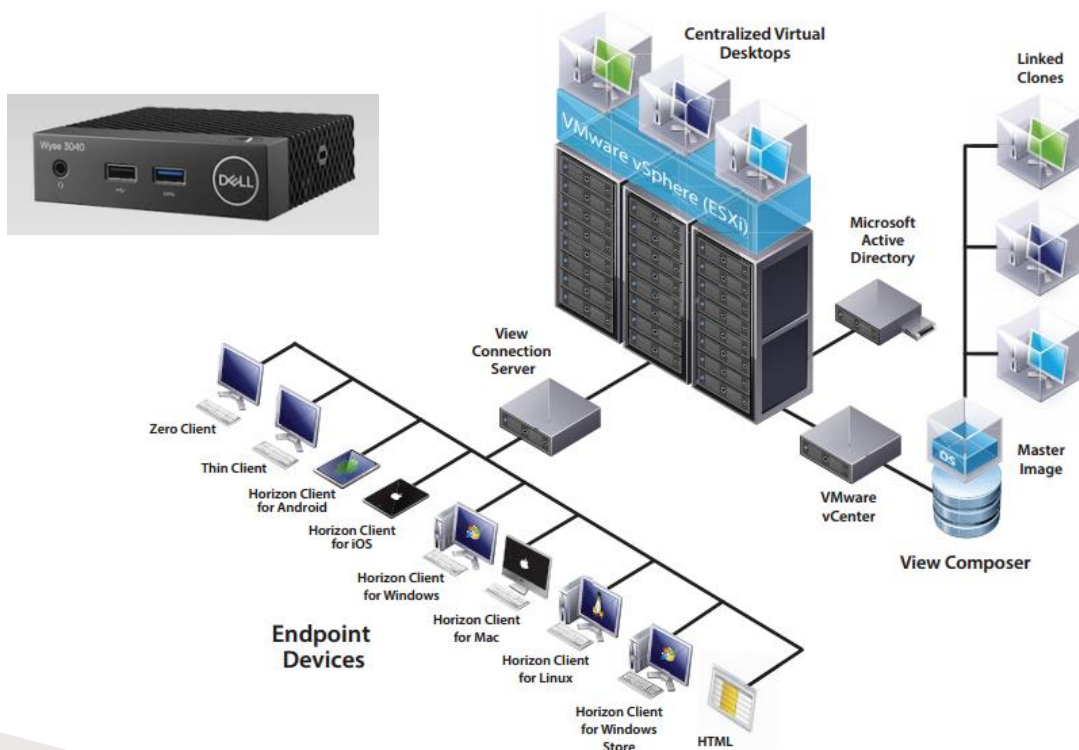

- › Prioritised public service delivery with the successful remote maintenance capability of the 5 key OSI systems (Ecommerce, Web Services, Email, Corporate Website, National GNSS Network).
- › Temporarily closed the OSI Map Sales Shop / Public Counter.
- › OSI flying operations temporarily suspended as it wasn't possible to maintain social distancing between pilot and the OSI sensor operator.
- › New production workflows developed for our 35 field surveyors with their Tough Pads at home in a desktop environment to remotely update the master database in Head Office using mono plotting.
- › All OSI departments reviewed their 'Incident Management Plans' in relation to BCP associated with the potential impact of COVID-19.
- › Development of numerous COVID-19 protocols with updated Standard Operating Procedures (SOPs).

Continuity of the Business Model

- › With the Irish economy projected to contract by at least 7%, we quickly identified a potential shortfall of €1.5m (15.7%) in OSI 2020 funding from commercial activities.
- › Made timely, but tough, decisions regarding savings in Operational Expenditure (OpEx) and Capital Expenditure (CapEx), identifying savings of €700k (3.4%) in OpEx and €690k (27.8%) in CapEx.
- › Prioritised our 2020 Service Level Agreement activities funding by Government, focused on supporting the national response to the COVID-19 pandemic rather than further development of our national UN Sustainable Development Goal portal).
- › Frequent and timely updates to the OSI Board and our parent department.

Continuity of connectivity & communications

Continuity of Operations

› Flying operations have resumed

- Certification by the Irish Aviation Authority (IAA) of a dividing curtain to facilitate social distancing compliance within the aircraft.
- Have procured some third party imagery to address shortfall in capture due aircraft grounding.

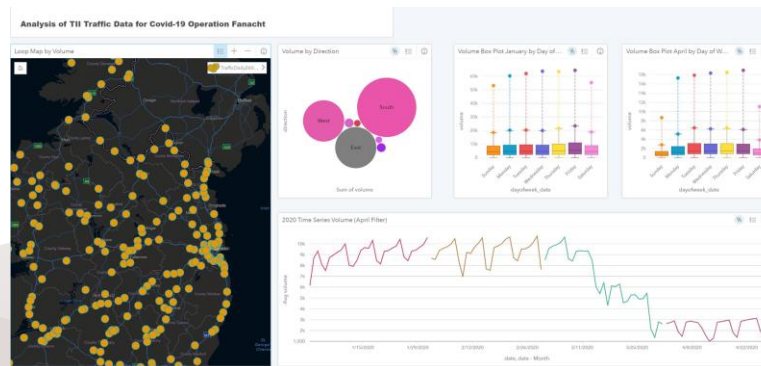

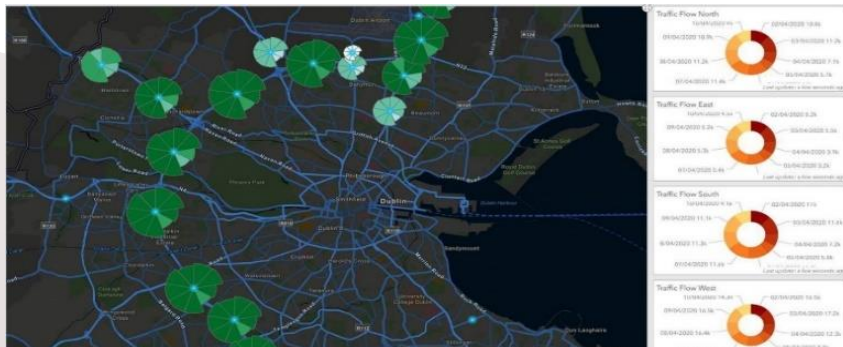

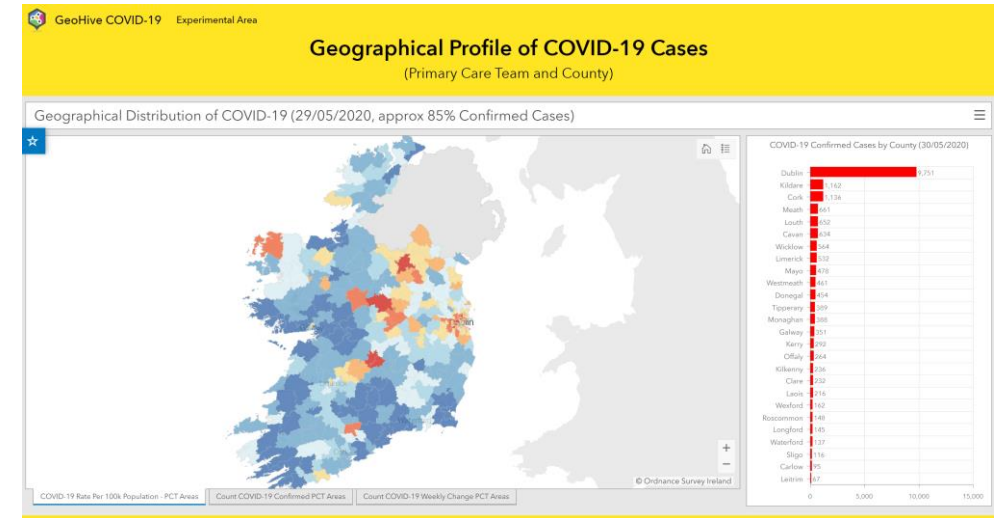

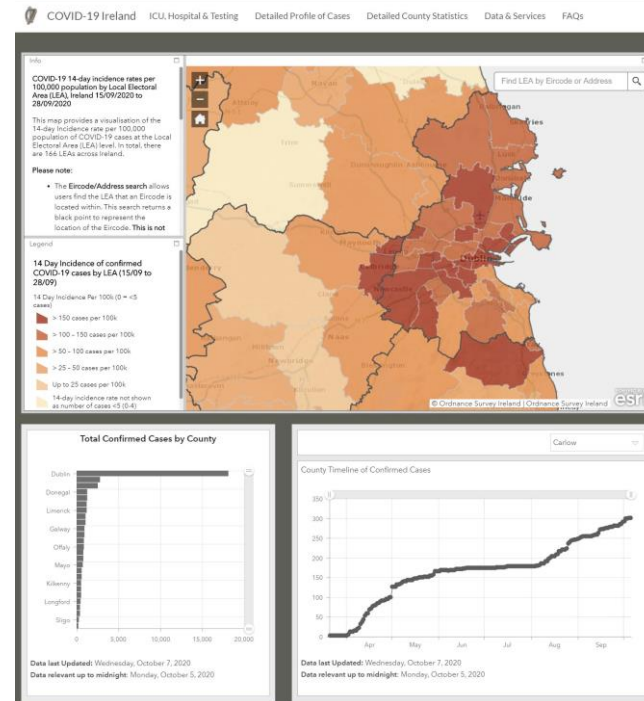

› Field surveying operations have resumed

- Working to address a shortfall of 30% of building footprint capture due suspension of field surveying.
- In the process of bringing some digital stereo photogrammetry capability back in to the office.

› Following the development of COVID-19 protocols and the updating of Standard Operating Procedures, those critical activities that can not be done from home have been brought back in to the office

- Currently 80% of staff continue to work from home.
- This is reducing to 70% with the return of some stereo photogrammetrists to the office.

COVID-19 – Showing the real value of Geospatial Information

Business Continuity during COVID-19 – ‘Take-a-ways’ (so far)

1. Continued investment in technology was a key enabler to business continuity
2. Implementing orchestrated systems approach to production enabled easier transition to home working
3. Importance of having multi-trained staff to enable flexibility and agility in resource activity planning
4. Importance of connectivity and communications to maintain a near ‘business as usual’ operation
5. Importance of focusing on staff wellbeing & mental health
6. IT Security Training & Awareness is more important than ever in a remote working environment
7. Further development of remote sensing capability will mitigate reliance on field data collection
8. Do we need to maintain a Map Shop post COVID-19 with nearly all users now self serving online?
9. This challenging period has also been the most important time for geospatial value recognition

An aerial photograph of a city street, likely in Dublin, showing a mix of residential and commercial buildings, a railway line, and a canal. A diagonal white line runs from the top right corner towards the bottom left, separating the aerial image from the white background on the right.

Thank you
