

# BUSINESS CONTINUITY AT LANTMÄTERIET

---

SUSANNE ÅS SIVBORG, DIRECTOR GENERAL, LANTMÄTERIET, SWEDEN

# WE ARE

Lantmäteriet, the Swedish mapping, cadastral and land registration authority, is a public authority under the Ministry of Finance. Our activities are essential for a well-functioning society.

Our aim is to contribute to a sustainable society with even more efficient building and planning processes as well as economic development by ensuring and supporting effective and well functioning processes for:

- building and developing real properties and the society's infrastructure.
- purchasing, owning and selling real properties.
- searching, finding and using geographical information and property information.

# SOME FACTS ABOUT US

About 2 200 employees

Offices at 50 locations  
in all parts of Sweden

## Large volumes of errands

**12,1 billion SEK** (about 1.2 billion Euros) in stamp duty

**265 million SEK** (about 26.5 million Euros) in service fees

**Lantmäteriets turnover:** 1,9 billion SEK (about 190 million Euros)

**Total mortgage value in Sweden :** 5,7 trillion SEK (about 570 billion Euros)

**VISION** Secure, fast and available  
regarding location and ownership

Vision

## Purpose:

Lantmäteriet contributes to the foundation of the national economy in society. Our information is the basis for conscious decisionmaking contributing to sustainable development of the society in Sweden.

Vision

Purpose

## Mission

Secure ownership of real properties and ensure the availability of spatial information to society.

Take the lead in the digitalisation of the building and planning processes.

Vision

Purpose

Mission

# OUR CORE PROCESSES

## Cadastral Service Division

Responsible for property division. In other words, making decisions on new property units and making changes to existing boundaries.

The division is also responsible for making decisions concerning joint properties, easements and rights of way..

## The Land Registration Division

Examines, makes decisions on and registers title transactions, mortgages, site leasehold rights and other rights that are then recorded in the Real Property Register. The division also makes decisions on and handles stamp duty and other charges.

## The Geodata Division

Collects, stores and update geospatial information about Sweden's geography and properties, and makes this information available to the general public, the public sector and the private sector.

# BUSINESS CONTINUITY DURING THE PANDEMIC

- All staff are asked to work from home, if possible. Our experience is that this has worked much better than anticipated. The new normal in the future will most probably include staff working from distance several days per week
- We are following the recommendations from the Public Health Authority and other authorities.
- Stay home if you are/feel the slightest sick or ill.
- General rule - No travelling national or international.
- However, we have now started to allow some national travelling between offices for business critical matters, but it is still not generally recommended

# MANAGEMENT TEAM

- Since mid March the management team works in a state of readiness with weekly (even several times per week depending on situation) meetings to report status in the organization. To ensure and make new decisions, positions and recommendations regarding the development of the pandemic and the recommendations of the authorities
- All managers in the management team have produced continuity plans which are updated on a regular basis.

# OPERATIONS

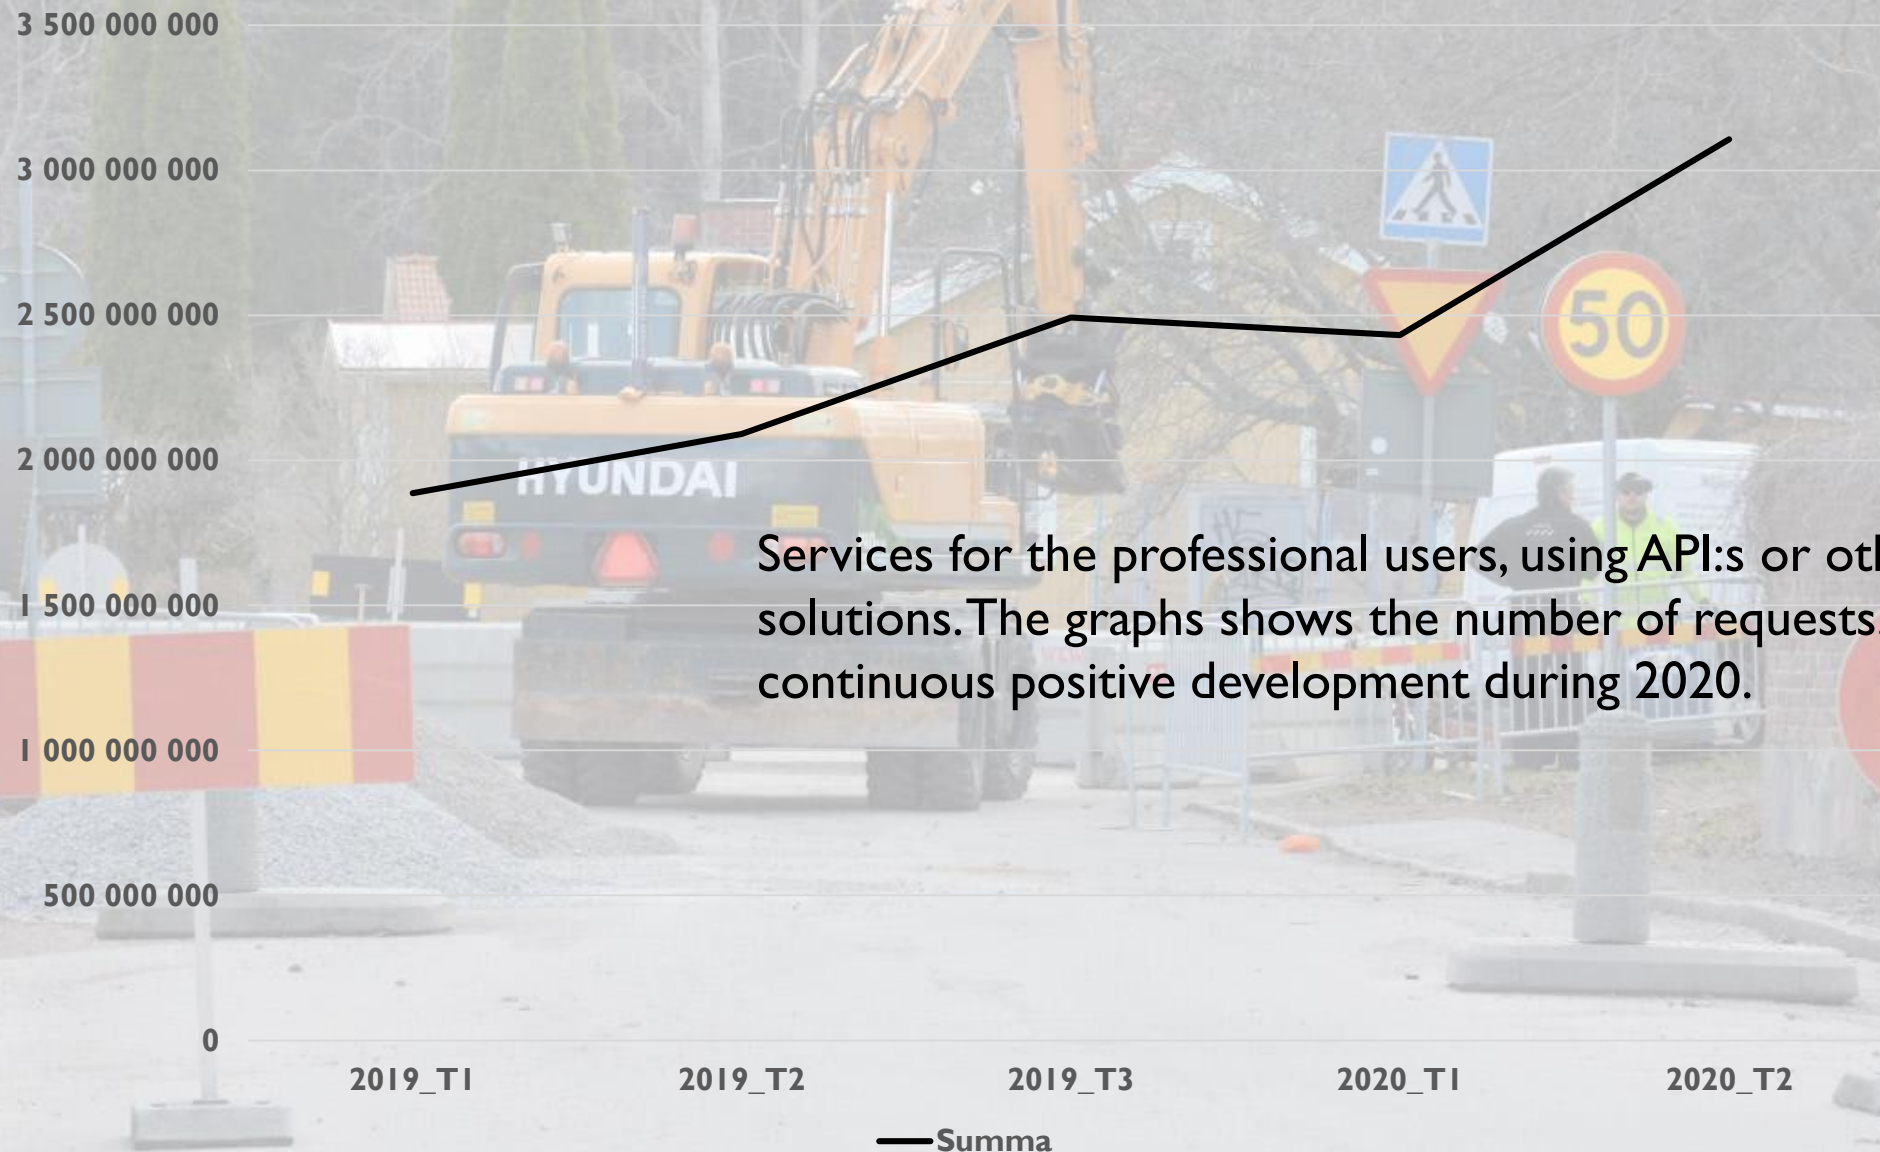

- The operations are more or less the same!
- The request of on-line services have increased
- Airborne services, e g airborne photogrammetry and laser scanning, have noted that airspace has been empty from other aircrafts and therefore easier to plan. However, weather conditions are more crucial for the operation.
- Cadastre services have been a bit affected since no meetings with large number of participants or citizens in risk groups. On the other hand, more digital meetings and increased work on applications for cadaster services
- Our international aid projects runs in a lower tempo and digitally. Our international based staff were forced to return to Sweden.

# PUBLIC E-SERVICES (APPLICATIONS)

# GEOACCESS SERVICES (INCL. APIS AND DOWNLOADING)

Services for the professional users, using API:s or other solutions. The graphs shows the number of requests. A continuous positive development during 2020.

# OPEN DATA SERVICES (INCL.APIs AND DOWNLOADING)

# SUMMARY

- Staff is working from home. And very much business as usual. Our production is as expected or even better. People working from home are working more focused?
- Innovation and development is affected.
- The usage of our on-line services have a positive development
- Closing more cadastral cases than normally at the moment. More complicated cadastral cases are difficult to handle solely digitally and when working on distance
