

THE MERIDIAN ARC CAPE TO CAPE

De Graeve Jan
Vilnius 2014

Résolution FIG Réunion I :

“Considering the great historical value of the measurement of the arc of the meridian, and that an inventory exists of land monuments marking the arc of the meridian, called Struve, which extends over 9* countries and 25° of latitude from the Black Sea to Hammerfest situated on the north coast of Norway, Commission 1 recommends that FIG should present a request to the United Nations that the remains of this arc of meridian be added to the World Heritage List of Historical Monuments”.
