

Breakout session Group A

Marieke Kuijer and Tony Baving, Kadaster NL

2017

2018

2019

Participants

First name	Last name	Email	Organisation	Country
Jarmila	Váňová	jarmila.vanova@cuzk.cz	Zeměměřický úřad	Czech Republic
Regine	Elling	regine.elling@bkg.bund.de	Federal Agency for Cartography and Geodesy (BKG)	Germany
Alexander	Reichelt	alexander.reichelt@bkg.bund.de	BKG	Germany
Jörgen	Spradau	joergen.spradau@bkg.bund.de	BKG	Germany
Tony	Baving	tony.baving@kadaster.nl	Kadaster	The Netherlands
Marieke	Kuijer	marieke.kuijer@kadaster.nl	Kadaster	The Netherlands
Agata	Kucharczyk	agata.kucharczyk@gugik.gov.pl	GUGIK	Poland
Magda	Woźniak	magda.wozniak@gugik.gov.pl	GUGIK	Poland
Tomáš	Dekan	tomas.dekan@skgeodesy.sk	Geodetic and Cartographic Institute Bratislava	Slovakia
Pavol	Lucanik	pavol.lucanik@skgeodesy.sk	GKU	Slovakia
Nicol	Maron	nicol.maron@avannamut.ch	swisstopo	Switzerland

Missing participants:
 Belgium, Luxembourg and Belarus

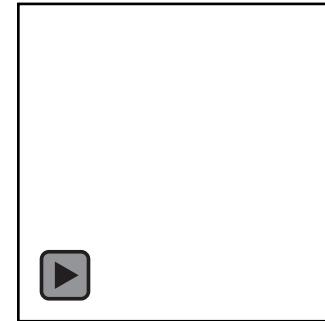

Expert group!

- Jarmila 14 years involved within the project!
- Others <1, 4, 7 or 9 years!

ERM production

- Production of this year (Hydro and Pop)
 - > Not many issues
 - > RC: most countries delivered on time ☺
 - Waiting for two countries.
 - > Data quality very good!

Thank you! Great job!

National Data

- Question to our group members:

Are you using the dataset that BKG send to you for the next production?

Or do you continue with the updates of your own national data set?

Result:

2 countries are using the dataset BKG send to them to start the new update.

3 countries are continuing the updates with there own national dataset.

National Data

Questions from multiple countries:

Could BKG provide datasets after the final without the Features on Border (for update next version)?

-> Easy, also for EBM already done.

Edge matching:

Italy has created a tool that checks the edge matching.

-> Maybe integrate in the ERM validator? Ask Paolo ☺!

Feedback/questions on the given presentations

- Easier with names and other simplification of specs!
- Nice more questions via Slido!
- More interaction with the producers!
- Shorter meeting = fine! (Sleep longer!)

ERM validator tool

- Used by all countries
 - > Normally it runs within one hour.
(Except for CH, it takes four hours on VDI (VirtualPC)).
- In general: Runs well and the group is very happy with the tool! 
- Problems / issues:
 - > Need some changes with International Boundary and CFP (vertices).

Communications

- Production Management System (PMS)
 - > All countries have access
 - > Contacts are up-to-date
- BKG-ftp server
 - > All countries have access and have no problems
 - > Used for data exchange
- Additional knowledge exchange needed in a webinar?
 - > Not at this moment

Data assembly

- Please don't deliver the features on border! Only when there are changes ☺
- We are waiting for two more countries, and then we can send it to BKG.
- No data from Luxembourg this year, old version is being used.

Questions to BKG and Angela

- Question, on EBM status of validation
 - > See the status of your EBM dataset on PMS.
- The new way of metadata is much better than the old excel documents! ☺
- Would it be possible to add a vertex to the International Boundary where a CFP is placed? Currently the tool gives an error if this is not the case.
 - > It is not desired to add extra vertices to the International Boundary.
Maybe the ERM validator check can be adjusted.

To fill in the old excel metadata documents like.....

Thank you for your attention!
