Data Strategy

- Data Access strategy is **facilitate access to our members data**
 - Make our member data used and re-use, and at forefront of GI discussion for policy makers
- Meeting User Requirements

Large scale

Key Themes

Change only
updates

Harmonised &
edgematched

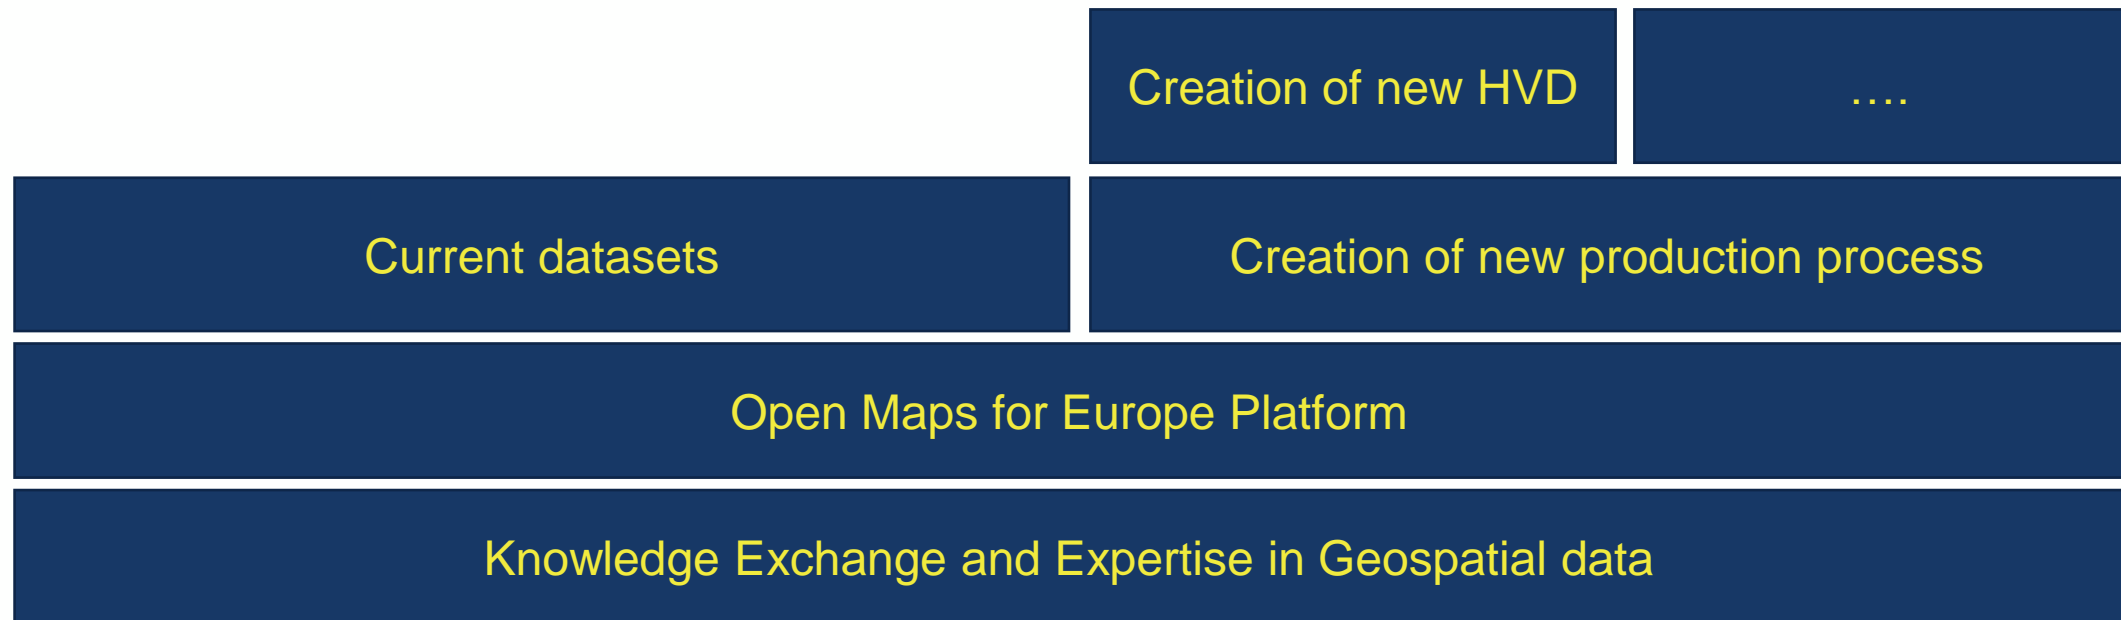

Authoritative

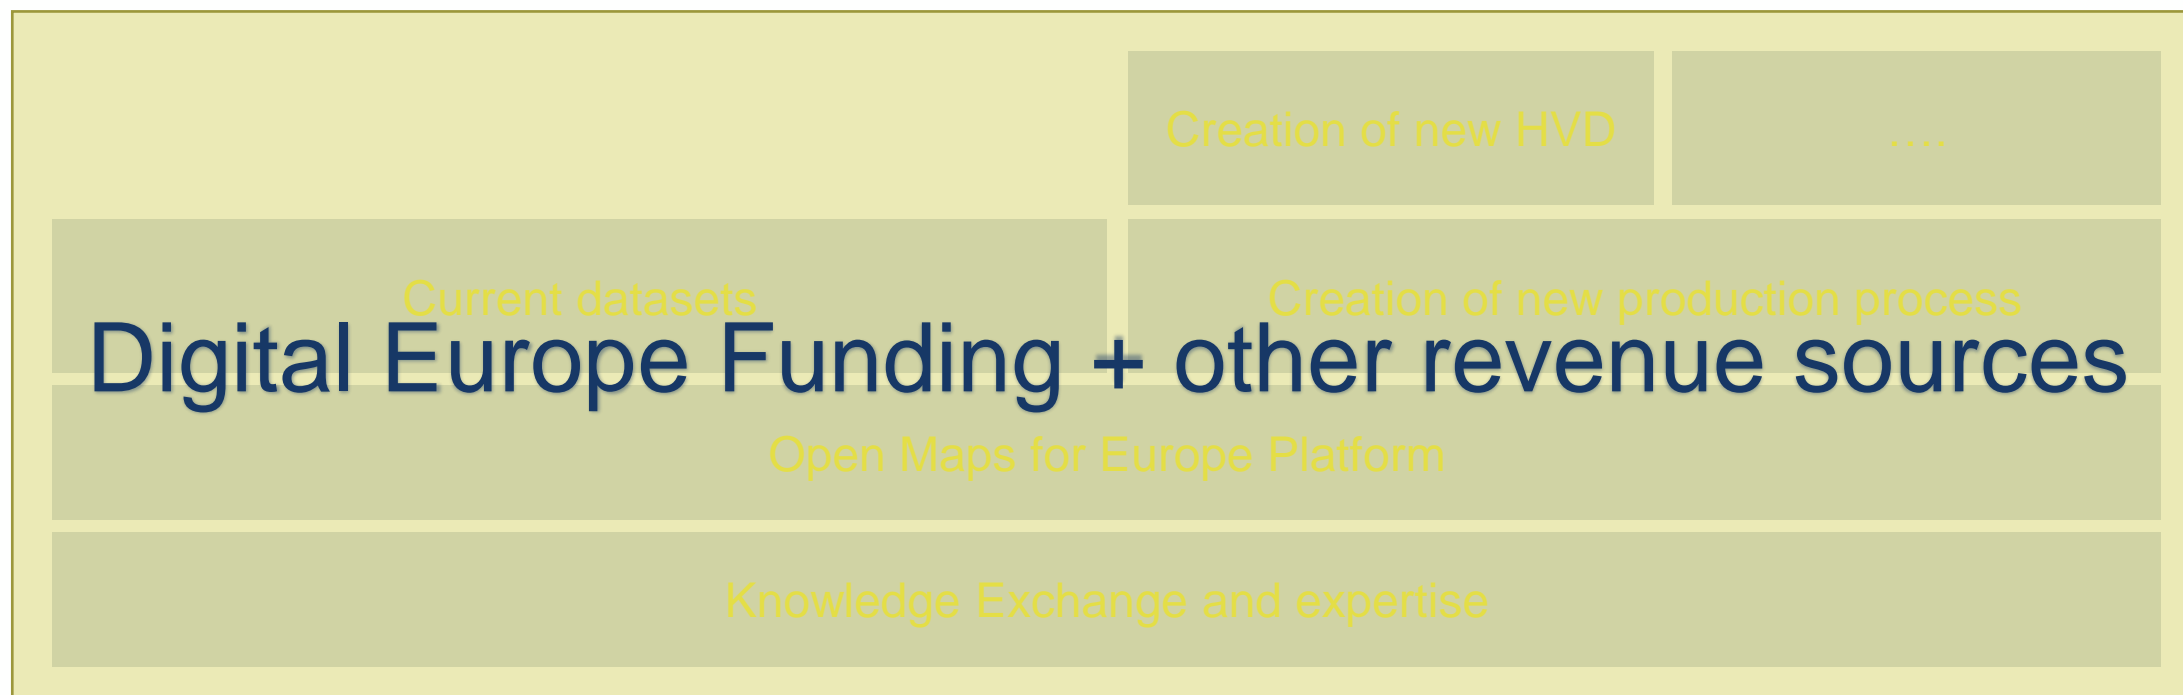

Geographical
Europe
coverage

Meeting Requirements of users

Meeting Requirements

Bid Requirements

In early spring a number of bids were launched under the Digital Europe funding Programme

The objective of the bid was to:

“Boost the re-use of open public data across the EU for the development of information products and services”

- It was specifically linked to High Value Datasets
- Offered 50 % funded
- Had to include a minimum of 3 partners

Bid Requirements

OME2 was
SUCCESSFUL!

Consortium

EuroGeographics – Co-ordinator

IGN France

NGI Belgium

**Kadaster
Netherlands**

Spanish Cadastre

**Hellenic
Cadastre**

Subcontractors – BKG and IDOX France

What OME2 will deliver

- Continuation of the OME platform and delivery of current datasets (EGM, ERM, EuroDEM, Open Gazetteer, Imagery Layer and Open Cadastral Map)
- Enhancements of the platform in line with user feedback
- Creation of the large scale production process, to test the feasibility to produce large scale harmonised pan-European datasets
- Specifically for boundaries, hydrography & transport
- Enhancement and extending the coverage of the Open Cadastral Map

6.3 Increase coverage																																					MS6.1																MS6.2															
6.4 Increase harmonisation																																																																				
6.5 Promote Cadastral Map																																											D6.2																									

The future

- OME2 will deliver a production process and tools to enable the creation of Large Scale harmonised HV pan-European datasets
- Increasing coverage, adding themes continued maintenance
- Long term Sustainability
- Migration from data provider to an enabler
- Providing the infrastructure to enable users to access members high value authoritative data
- Focus towards members data, knowledge and expertise
- Thank you!
