

# PosKEN – Positioning Knowledge Exchange Network

Danko Markovinović - Croatia

## The Value of Knowledge Exchange Networks

Extraordinary General Assembly  
May 2016

# PosKEN Objectives - 1

- **What are the TORs and objectives of the PosKEN?**
  - Interoperability and cooperation
  - Supporting learning and quality control
  - Sharing best practice and transfer knowledge
  - Coherence and providing information
  - Promoting GNSS results

# PosKEN Objectives -2

- **What are the TORs and objectives of the PosKEN?**
  - collect and coordinate users, providers, scientific community and policy makers on ONE place under EG umbrella
  - tracking standards, guidelines and recommendations
  - provide a networking platform for experts
  - cooperation with GNSS producers
  - harmonize the position of GNSS network operators and users
  - advertise the use of ETRS89 in Europe
  - to help EG members – start from the beginning
  - to show results of GNSS works to the other users

# PosKEN Objectives

- **What does the KEN aim to achieve?**

- create a big EU GNSS family
- implement GNSS standards and recommendations
- avoiding parallel works
- grow number of users
- access and exchange data

- **How does it achieve these aims and objectives?**

- short – mid – long term strategy (SWOT analysis)
- strong cooperation all members – to define responsible person
- track and participate on all relevant events and share conclusions
- MoU with main key players (EUREF, CLGE, EUPOS)
- webinar/workshops/key presentation/key experts/

# Part of the Bigger EuroGeographics Picture

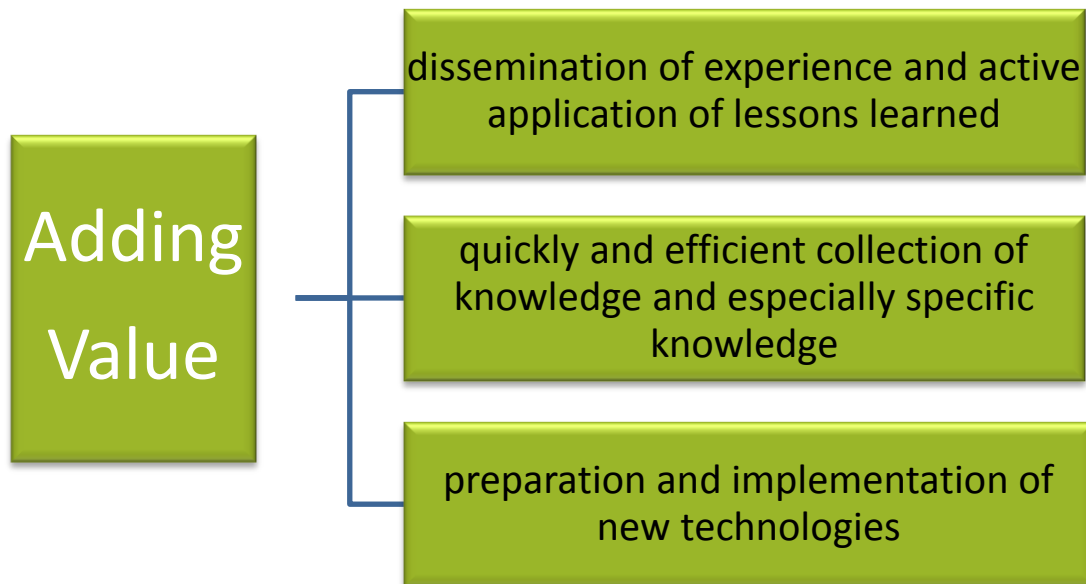

- **How do the KEN objectives meet/align with the strategic objectives of EG?**

1. *Provide the voice of our members*  
„to hear” request of members
2. *Develop the network of members*  
include more (all) EG members
3. *Develop the European Location Framework*  
including GNNS networks/data in ELF
4. *Facilitate access to members’ data and expertise*  
develop and establish network of experts and encourage cooperation between members
5. *Grow our network of members*  
increase number of users and stakeholders

# Adding Strategic Value to Member NMCA's

- **How does the PosKEN contribute to the member organisations?**

# Value of Participation

- Why is it important to actively participate in the KEN?
  - unique standards and preparation for Galileo
  - interoperability of data and products
  - application for EU and other projects (local and regional)
  - save time and money
- What will members gain by participating in the KEN?
  - supporting on technical levels
  - „on line” information from EU strategy and unified guidelines
  - unique cooperation on scientific level

Thank you
