Production v2021

ERM production of AT, MK, RS, SI went well:

- Data is ready for assembling

- Use of ERM Validator was easy and very helpful

- Change of missing values in attributes was the biggest challenge

No ERM updates from:

- HU: change of responsibility still underway

- HR: no resources and organizational change

eurogeographics

Production v2022

Expected Updates:

- AT, HR, HU(?), MK, RS, SI

- BH ?

Challenges:

- Still no political agreements regarding international boundaries (BH, HR, RS, SI)

Special topics

How to deal with metadata when no production was done?

- Alex has to set up production year

- Afterwards producers have possibility to copy metadata from last year

EBM – HR

- Specific problems were discussed and clarified

Theme NAME from MK and RS will be initially integrated in ERM version 2021

Thank you!
We are looking forward to a successful new production period!
