Albania	none	yes
Bosnia and Herzegovina	VMap	yes
Kosovo	Provided by Serbia	yes
Armenia	none	none
Azerbaijan	none	none
Belarus	none	none
Georgia	yes (no BND)	none
Russia	none	none

EuroGeographics

- EuroGeographics wants to increase coverage for many reasons:
 - To fulfil our Eurostat contract
 - To support our other existing customers
 - To improve our products
 - To support our members by promoting their data

EuroGeographics Support

- We have allocated some budget for capacity building
- BUT we need to know what support you need:
 - Technical assistance from Production Team
 - Senior support through EuroGeographics Secretary General
 - Technical or product training (on site, webinar series or by spending time with key production team members)
 - Data Quality support
 - Giving Production team access to your portals so we can create data
- Some data is better than nothing
- Please talk about this in your sessions this afternoon
- We will send out a survey following this event

Thank you for your attention
