# Statistic framework regulation proposal

Background – reasons for and the objectives:

- Social fairness for all citizens
- Social goals must be supported by a solid evidence base
- EU needs **reliable and timely** social statistics to monitor and to impact in the MS and their regions
- 
- Good policies start with good data

## Background – reasons for and the objectives:

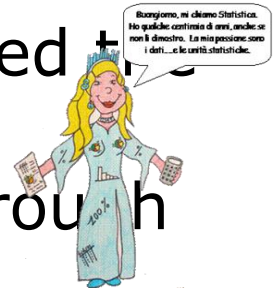

1. ESS produces statistical data:
2. taken from variety of sources: population census, aggregated admin data, data from business, & data and persons collected from samples - the proposal is related to this source since the current system is made up of separate domain specific Regulations, i.e. 5 legal basis
2. REFIT programme initiated integration process
3. REGULATION proposal is outcome, it lays down the same law throughout EU unlike directive

# State of play

- On the 24<sup>th</sup> August the Commission adopted the proposal text;
- That is the start of proposal's passage through the legislative process;
- expected to be adopted by the Parliament and the Council in 2017 or 2018;
- adoption of implementing measures by the Commission to follow shortly afterwards;
- Upon entering into force, the Regulation shall be binding in its entirety and directly applicable in all Member States.

# About regulation

- sets up a framework for European statistics relating to **persons and households** based on data at individual level collected from samples
- **specifies** the data and information to be collected and submitted by MS
- and includes the fundamental **quality requirements** to be met by the data
- provides for more detailed technical specifications to be given in **delegated acts and implementing measures**
- allows the various data collections to be **integrated** with one another and with the use of administrative data, while consolidating and simplifying existing legislation

# Regulation - articles

1. Subject matter
2. Definitions (pre-checked data or metadata, domain, observation unit, topic, administrative records, ad hoc subject, headline indicator)
3. Data sets
4. Multiannual rolling planning
5. Statistical populations and observation unit
6. Technical specifications of data sets
7. Standards for transmission and exchange of information
8. Data sources and methods
9. Periodicity of the data sets
10. Data transmission and deadlines
11. Sampling frames
12. Quality
13. Feasibility and pilot studies
14. Financing
15. Exercise of the delegation
16. Committee procedure
17. Derogations
18. Repeal
19. Entry into force
